

Dear reader,

Please explore our on-line visitors guide to Owlthorpe Heritage & Nature Trail. Scroll down the page to see points of interest. <https://www.ecological-owlthorpe.org/directionsmaps.htm>

If you double click on any of the interpretation board photos you will be able to view a large version, which enables you to read online, the extent of environmental work carried out in creating our oasis.

To support the project, Government funding was provided by Natural England, under their higher-level stewardship agreement.

The google maps show the GPS coordinates, which help if you decide you wish to visit in person.

Many parents bring their children and use the interpretation boards to educate them about the wonderful environment we live in.

Owlthorpe is very steep; some locations show the height above sea level.

Scrolling down the page we have several short videos which you may find interesting.

Please share with Friends & Family.

Thank you for your attention

Michael Meredith
